

simulated decorative objects 710, and, if included, the post portion 776 of inspirational sign 768. The decorative bouquet can be covered in a cellophane-like material for transport and display.

AM Figure 33 illustrates an alternate mechanism for locking a product carrier into a decorative frame other than that illustrated in Figures 28 and 29. Any arrangement which provides for a valley 762 in the product carrier large enough to receive the decorative frame, such as support frame 712 will function to retain a package such as product carrier 714. In particular, Figure 33 illustrates a product carrier 814 with a non-conical sidewall 878 which includes an annular bump which defines an annular valley 882 for lockingly receiving a decorative support frame 812.

IN THE CLAIMS:

Please SUBSTITUTE the following amended claims for the corresponding pending claims with the same numbers:

A12 Claim 15 (Amended). A package as claimed in Claim 1 wherein said container comprises more than one chamber, said more than one chamber being autonomous of each other.

A13 Claim 17 (Amended). A package as claimed in Claim 1 wherein said container comprises more than one chamber, said more than one chamber being in

A13

communication with another chamber wherein contents of one chamber can move to another chamber.

Claim 24 (Amended). A decorative container comprising:

(a) a sculptural frame, said frame defining an inner receiving surface; and

(b) a product containing package, comprising:

(i) a front portion having first mating and locking structure, at least a portion of said front portion being transparent;

(ii) a rear portion having second mating and locking structure, said second mating and locking structure mating with said first mating and locking structure, said front portion and said rear portion together defining a chamber for receiving a product, said product containing package having a generally annular sidewall configured and dimensioned to matingly be engaged by said inner receiving surface.

A14

Claim 25 (Amended). A decorative container as in claim 24, wherein said sculptural frame includes an upper portion defining said inner receiving surface and an elongated support member.

Claim 27 (Amended). A decorative container as in claim 24, wherein said product containing package generally annular sidewall defines a conical shape for contacting said inner receiving surface.

A15

A16
Claim 32 (Amended). A decorative container as in claim 31, wherein said support member is a pot with a support structure contained within said pot, wherein each of said sculptural frame includes an upper portion defining said inner receiving surface and an elongated support member, said support structure receiving said elongated support members.

A17
Claim 34 (Amended). A decorative container as in claim 24, wherein said product containing package generally annular sidewall defines a valley for lockingly engaging said inner receiving surface, and wherein said product containing package generally annular sidewall defines a conical shape for contacting said inner receiving surface.

A18
Claim 36 (Amended). A decorative container as in claim 35, wherein said support member is a pot with a support structure contained within said pot, wherein each of said sculptural frame includes an upper portion defining said inner receiving surface and an elongated support member, said support structure receiving said elongated support members.
